EDUCATION

PCPS College, Patan College for Professional Studies | BSc (Hons) in Computer Science

Activities: Library Management System | Participation in [Clockmakers](#) | Service Management System |

Relevant Coursework: Object-Oriented Programming, Database Systems, Software Engineering, Web Development, Algorithms and Data Structures, Computer Networks

Certification: [Cisco Introduction to Networks](#) | [HP Digital Marketing Certificate](#) | [Coursera Excel & Data Analysis Completion](#)

PROFESSIONAL EXPERIENCE

Web Development Intern

PCPS College | Kathmandu

Feb. 2024 – Apr. 2024

Built interactive, responsive web pages using HTML, CSS, JavaScript, and Java Servlet.

Designed and integrated backend systems using MySQL and Jakarta Servlet to manage service requests. Collaborated on UI/UX improvements and optimized performance on college-level systems. Conducted internal testing for quality assurance and database functionality.

Freelance Developer

Remote

Jan. 2023 – Present

Developed custom client applications, including a Library Management System and a Service Management System using Java, JSP, and Apache Tomcat. Built responsive interfaces and ensured seamless server-client interactions.

PROJECTS

Taxi Booking System

- Built a complete Python-based booking system with modules for customer registration, driver login, admin control, and fare calculation.
- Implemented GUI using Tkinter and connected to a MySQL database for data persistence.

Chef Port (Ongoing)

- Developing a React + .NET C# application for chefs to post recipes.
- Enables food lovers to view and explore recipes shared by culinary professionals.

- Implements secure user login, recipe submission, and search features with responsive design.

Library Management System

- Designed and tested a Java Servlet-based system for managing book inventory, issuing records, and member services.

The Service Management System

- Built a dynamic backend system for handling service requests, scheduling, and status tracking.
